## Marban Project : Where are we?

The Marban Project, located on the Malartic property, is situated a few kilometers from the town of Val-d'Or, halfway to the town of Malartic.

It is easily accessible by road, and the property is served by hydroelectricity. The project has reached the pre-feasibility phase, where technical, economic and environmental studies will be conducted to determine if the mine itself will be located on the identified site.

## O3 Mining, a new generation of explorers

We are pleased to present the very first edition of the O3 Mining Newsletter, which will be published to inform community stakeholders, including its citizens, about our activities and projects as well as our social and community involvement.

Established in Val-d'Or in 2019, O3 Mining has two main projects on the Malartic and Alpha properties. Thanks to its partnerships and strategic links with the region's communities, O3 Mining is proud to be in touch with the various stakeholders in order to develop projects that respect the communities and the environment.

## Projects

In addition to the Marban Project, O3 Mining is currently developing the Alpha property, which was first explored in 1930. Over 2,400 drill holes have been completed since then. Alpha is an easily accessible project, just a few kilometers from Val-d'Or.

## 2021 Objectives

To date, 2021 has been a successful year for O3 Mining. O3 Mining has set clear objectives to reinforce its corporate responsibility and commitment to the Val-d'Or community.

O3 Mining is committed to protecting the environment and reducing its environmental impact, generating long-term benefits for all stakeholders, and to leading governance best practices.

## Grants and Donations

O3 Mining recently donated \$3,000 to the scholarship fund of the Cégep de l'Abitibi-Témiscamingue Foundation in support of the Mineral Technology program - Geology option.

O3 Mining has also donated \$10,000 to the Brousseau-Dargis Foundation to support mental health programs throughout the Gold Valley RCM, a cause that is close to its heart.

### Uses of Gold

The best known uses of gold are of course jewelry. About 50% of the world's demand for gold goes into the manufacturing of these items that we wear with pride.

Gold is also used largely for investment products, such as gold bars, coins and wafers, which some people treasure in well-protected places.

However, gold is also used in technology. We find small amounts of gold in our computers, televisions, cars and smartphones, for example. So you have more of this precious metal than you think!

## About us

O3 Mining Inc. (TSX-V: OIII; OTCQX: OIIIF), an Osisko Group company, is a gold explorer and mine developer on the road to produce from its highly prospective gold camps in Québec, Canada.

It is well-capitalized and owns a 100% interest in all its properties (137,000 hectares) in Québec.

The company is focused on delivering superior returns to its shareholders and long-term benefits to its stakeholders.
