

O3 Mining

The New Generation of Explorers

The ABCs of Mining Exploration

Airborne Mining Exploration

During its 2022 summer drilling campaign, O3 Mining will carry out some exploration work using helicopter-borne drills. The Abitibi-Témiscamingue region is known for its rich underground. However, it is not only the underground that contains rich resources. The biological diversity of the surface is a jewel that deserves to be protected for the community and future generations.

For this reason, O3 Mining will use a helicopter for more sensitive areas. Helicopters will require less handling and less use of heavy land vehicles. Although these methods are more expensive, O3 Mining is committed to developing its projects in a responsible manner and has therefore opted for this hybrid solution.

Transporting the drills by helicopter has two major advantages. First, it limits the impact on the soil since no heavy machinery is required. Second, this method limits deforestation since it is not necessary to open access roads.

It is important to note that this work will be carried out in a safe manner not only for the workers, but also for the surrounding community. Furthermore, all helicopter activities will be carried out during the day.

O3 Mining is aware that these procedures may raise questions, and remains available to answer any questions or concerns. O3 Mining reiterates that its objective is to develop its projects in a responsible manner and in cohesion with the host communities.

O3 Mining seeks not only to deploy environmentally friendly work methods, but also to maintain good communication with the community.

If you have any questions or would like to speak with someone in the Sustainability Department, you can write directly to esg@o3mining.com.

Citizen Meetings

At the end of May 2022, O3 Mining held two meetings with concerned citizens to include their comments in certain decisions in the development of the Marban project.

O3 Mining would like to thank all those who participated in these meetings, and to reiterate its willingness to plan its projects in advance and in collaboration with the local community.

To this end, O3 Mining is planning a more general public information meeting once the Marban project pre-feasibility study is published. This meeting will be an opportunity to provide an update on the project and answer questions from the citizens in attendance. Keep an eye out for our future communications for more details.

O3 Mining Presents its 2021 ESG Report

O3 Mining is proud to present its 2021 ESG report, the second since its inception. This report presents O3 Mining's performance and achievements in relation to the environmental, social and governance aspects of its operations.

In this report, you will read about the various initiatives we undertook in 2021 in relation to our five pillars of sustainable development: governance and ethics, health and safety, environment, talent and culture, and community. You will also see several indicators that we track in order to continuously improve our ESG performance.

To read our ESG report, which includes detailed information on our performance, you can consult our [Sustainability - ESG Report](#) section on our website!

We Are Hiring!

O3 Mining is always looking for new talent to join our dynamic team. Come join our dynamic and growing team!

Do you want to be part of the new generation of mining? Check here for all our job opportunities, or go to our website at <https://miniereo3.com/careers/>.

News & Activities

Events

On May 4th, 2022, O3 Mining hosted representatives from the municipal, Aboriginal and business communities at a breakfast hosted by its President and CEO Jose Vizquerra. The breakfast was an opportunity for O3 Mining's partners to ask questions about the progress of its projects.

On May 18th, 2022, Jean-Félix Lepage, Director of Operations for O3 Mining in Val-d'Or, gave a conference at an event organized by the Val-d'Or CIM. The conference focused on O3 Mining's activities and projects in the region.

Earth Day

As part of Earth Day held on April 22nd, 2022, O3 Mining distributed baskets of eco-friendly products to its employees, and gave away two of them among the subscribers of its Facebook page. Congratulations to the winners!

Sponsorships

O3 Mining is proud to have contributed to the Cégep de l'Abitibi-Témiscamingue Foundation's scholarship program. Thanks to its contribution, two scholarships were awarded in the geology program, one to Milly Gauthier for academic excellence and one to Marie-Christine Gauthier for school perseverance.

O3 Mining also supports "Women in Mining", a non-profit organization that, through its collaborative and mobilizing efforts, promotes both accessibility and diversity within the mining sector.

Val-d'Or Chamber of Commerce

O3 Mining is a finalist in the 42nd edition of the Val-d'Or Chamber of Commerce's Gala de l'Entreprise. The winners will be announced on June 4th 2022!

Health and Safety Week

In order to continue to raise awareness with its employees on health and safety, O3 Mining organized its first Health and Safety week that took place from May 2th to 6nd, 2022.

During this week, topics such as feedback and energy drinks consumption as well as the emergency response plan were discussed.

In addition, activities such as an outdoor spring cleaning and outdoor and virtual reality fire extinguishing exercises were conducted.

Finally, O3 Mining organized a barbecue on May 4th, 2022 where employees participated in quizzes to improve their health and safety knowledge.

Message From the President

Have a Great Summer !

"I would like to thank our stakeholders who collaborate with O3 Mining and who took the time to come and meet us over the past few months.

Speaking with our host communities is a priority for me at every stage of our projects in Val-d'Or. Whether it is during lunch conferences or during citizen meetings, we want to answer all your questions and develop our projects in collaboration with the community.

We will continue our citizen meetings, and until then, I wish everyone a great summer!"

- Jose Vizquerra, President and CEO of O3 Mining

Did You Know?

One of the largest gold nuggets in the world

The second largest gold nugget in the world was discovered in Australia in 1980. It weighs nearly 27 kilograms and was sold for \$1 million to a casino in Las Vegas.

It was found with a metal detector only 30 centimeters below the surface of the earth!
